Foreword	3
Contents	4
1 Introduction into Service Robots	8
1.1 Structure of the World Robotics 2016 “Service Robots”	8
1.2 Classification of service robots by application areas	9
1.2.1 Definition “Service Robotics”	9
1.2.2 Classification of service robots by application areas	10
1.2.3 Cost-benefit-considerations in a nutshell.....	13
1.2.3.1 Digression: A brief remark on unit costs	13
1.2.3.2 Remarks on cost-benefit considerations	14
1.2.3.3 Remarks on benefit factors	15
1.2.3.4 Remarks on market analysis	15
1.2.3.5 Remarks on general economic aspects for professional service robots	17
2 Distribution of Service Robots	18
2.1 Service robots for professional use, sales 2014 and 2015	18
2.2 Service robots for personal and domestic use; sales 2014 and 2015.....	21
2.3 Projections for the period 2016-2019: Service robots for professional use	24
2.4 Projections for the period 2016-2019: Service robots for personal and domestic use.....	26
2.5 Overview	26
2.6 Service robots by region of origin	27
3 Major application areas for service robots	30
3.1 Introduction	30
3.2 Service robots for professional use	34
3.2.1 Field robotics	34
3.2.1.1 Agriculture.....	35
3.2.1.2 Milking robots and livestock robotics	42
3.2.1.3 Forestry and silviculture	45
3.2.1.4 Mining systems	47
3.2.1.5 Space robots.....	51
3.2.2 Professional cleaning	54
3.2.2.1 Floor cleaning	55
3.2.2.2 Window and wall cleaning (including wall-climbing robots).....	58
3.2.2.3 Tank, tube and pipe cleaning	60
3.2.2.4 Hull cleaning (aircraft, vehicles, ships etc.).....	62
3.2.2.5 Other cleaning tasks	63
3.2.3 Inspection and maintenance systems	63

3.2.3.1	Facilities and plants	63
3.2.3.2	Tank, tubes, pipes and sewers.....	67
3.2.3.3	Other inspection systems (inspection robots for nuclear plants).....	72
3.2.4	Construction and demolition.....	74
3.2.4.1	Nuclear demolition and dismantling.....	75
3.2.4.2	Building construction.....	79
3.2.4.3	Heavy/civil construction.....	82
3.2.4.4	Other construction systems (road construction)	83
3.2.5	Logistic systems.....	85
3.2.5.1	Automated Guided Vehicles (AGVs) in manufacturing environments.....	85
3.2.5.2	AGVs in non-manufacturing environments (indoor).....	89
3.2.5.3	Cargo handling, outdoor logistics	93
3.2.6	Medical robotics	95
3.2.6.1	Diagnostic systems	96
3.2.6.2	Robot-assisted surgery and therapy.....	98
3.2.6.3	Rehabilitation systems	103
3.2.6.4	Other medical robots.....	107
3.2.7	Rescue and security applications.....	109
3.2.7.1	Fire- and disaster-fighting robots.....	109
3.2.7.2	Surveillance/security robots	113
3.2.7.3	Other surveillance and security robots	118
3.2.8	Defence applications.....	119
3.2.8.1	Demining.....	120
3.2.8.2	Unmanned aerial vehicles (defence applications)	123
3.2.8.3	Unmanned ground-based vehicles.....	128
3.2.8.4	Unmanned Underwater Systems	132
3.2.9	Underwater systems (civil / general use).....	133
3.2.10	Powered human exoskeletons	137
3.2.11	Unmanned Aerial Vehicles UAV (general use).....	140
3.2.12	Mobile platforms in general use	141
3.2.13	Public-relations and joy rides	142
3.2.13.1	Hotel and restaurant	143
3.2.13.2	Guidance	144
3.2.13.3	Marketing.....	145
3.2.13.4	Robot joy rides.....	146
3.3	Service robots for personal/domestic use.....	147
3.3.1	Robots for domestic tasks.....	147
3.3.1.1	Robot companions, assistants, humanoids	147
3.3.1.2	Vacuuuming, floor cleaning.....	151
3.3.1.3	Window cleaning.....	154
3.3.1.4	Lawn-mowing.....	154
3.3.1.5	Pool cleaning	156
3.3.2	Entertainment robots.....	157
3.3.2.1	Toys and hobby robots.....	157
3.3.2.2	Multimedia robots.....	159

3.3.2.3	Education and research	161
3.3.3	Elderly and handicap assistance.....	163
3.3.3.1	Robotized wheelchairs	163
3.3.3.2	Personal aids and assistive devices.....	164
3.3.3.3	Personal transportation	168
3.3.4	Home security and surveillance	169
3.4	Examples of Service Robots by application area.....	171
4	Service robot manufacturers	200
5	Service Robotics Start-Up Companies.....	255
5.1	ADLATUS Robotics GmbH	256
6	Selected awards.....	260
6.1	IKAP Robotics: Olive – an intelligent suitcase	261
6.1.1	Philosophy	261
6.1.2	Some of our technologies	262
6.2	Robird: robotic falconry for effective bird control.....	264
6.2.1	Abstract	264
6.2.2	Effective and natural bird control.....	265
6.2.3	Participants	265
6.2.4	State of the art	266
6.2.5	Project approach.....	267
6.2.6	Results.....	267
6.2.7	Future	268
6.3	Autonomous, all-terrain chassis for walking excavators	269
6.3.1	Participants	269
6.3.2	Motivation and goals of the research and development effort.....	269
6.3.3	Project approach.....	270
6.3.4	Results of research and development	270
6.3.5	Achieved innovation and commercial impact.....	271
6.3.6	Handling of intellectual property rights and commercialization	272
6.3.7	Cooperation between research and industry with benefit for the partners ...	272
7	Selected research labs	273
7.1	Robotics and Perception Group (University of Zurich).....	273
7.1.1	History of the lab	273
7.1.2	Short Biography of Professor Davide Scaramuzza.....	274
7.1.3	Lab’s Research Topics.....	275
7.1.4	Why vision-based navigation?.....	275
7.1.5	Robustness, Demonstrations, Datasets and Open Source code releases...	281
7.2	State Key Laboratory of Robotics and Systems (Harbin Institute of Technology)	282
7.2.1	Origin and History	282
7.2.2	Structure and affiliations of the lab/center	282
7.2.3	Main activities	283

7.2.4	Research highlights in service robotics (i.e. non-manufacturing robots)	285
8	Standardisation and safety in Service Robotics.....	287
8.1	Introduction	287
8.2	ISO standardisation activities	287
8.2.1	Vocabulary and characteristics (WG 1)	288
8.2.2	Safety for personal care robots (WG 2).....	289
8.2.3	Performance criteria (WG 4)	289
8.2.4	Safety for medical robots (JWG 5)	290
8.2.5	Modularity (WG 6).....	290
8.3	IEC standardisation activities	290
8.4	IEEE standardisation activities	291
8.5	European “Topic Group” on standardisation.....	291
8.6	Possibilities to get involved in standardisation work	292
8.6.1	Attending international meetings	292
8.6.2	Contributing to national mirror committees	293
8.7	Relevant safety standards for service robots.....	293
9	ROS-Industrial: a worldwide initiative for Open Source industrial robotics	294
9.1	Trends in modern robotics	294
9.1.1	Why we need an Open Source platform for industrial robotics	295
9.2	ROS-Industrial: current status and future plans.....	296
9.3	From niche adoption to mainstream	300
