

World Robotics 2020

available September 2020

Foreword World Robotics Industrial Robots

Robotics is a hot topic these days!

Many cutting edge technologies are connected with the field of robotics, like machine learning and AI, IIOT, man-machine-collaboration or autonomous mobile systems. Intelligent robots are the crucial part of digitalization of the manufacturing industry. The global manufacturing industry is facing big challenges however, like rapidly changing consumer trends, shortage of resources, shortage of skilled workers, aging society, and demand for local productions.

Flexible industrial robot-based automation delivers the solution to all these challenges.

World Robotics observes the robotics industry and offers profound statistical data. It is your key to the world of industrial robots and service robots.

Annual installations of industrial robots – world

World Robotics 2020 Industrial Robots

Statistics, Market Analysis, Forecasts, Case Studies

worldwide distribution of Industrial Robots based on company reports

World Robotics 2020 Service Robots

Statistics, Market Analysis, Forecasts

worldwide distribution of professional and personal Service Robots based on company reports and market research

World Robotics 2020 Premium

World Robotics Industrial Robots and Service Robots plus database for Industrial Robots

online data query of installations and operational stock 1993 – 2019 for Industrial Robots

World Robotics Industrial Robots

PDF Version € 1300
Additional printed copy + € 200

World Robotics Service Robots

PDF Version € 650
Additional printed copy + € 150

World Robotics Premium

PDF Version + database access € 2200
Additional printed copies:
Industrial Robots + € 200
Service Robots + € 150
